# GitOps Working Group Update

Cornelia Davis, Weaveworks @cdavisafc Chris Sanders, Microsoft

# What is GitOps?

# Introducing the GitOps Working Group

## **GitOps WG Announced!!!**

The GitOps Working Group's goal

is to provide

companies and individuals

with the

knowledge, skills and competency

to implement GitOps

tooling and methodologies

which simplify the

operation and management

of

infrastructure and cloud native applications.

Educate on principles and effective use and promote tool interoperability

CLOUD NATIVE COMPUTING FOUNDATION

The Foundation's mission is to make cloud native computing ubiquitous.

The Application Delivery SIG focuses on delivering cloud native applications which involves multiple phases including building, deploying, managing, and operating.

https://github.com/cncf/sig-app-delivery

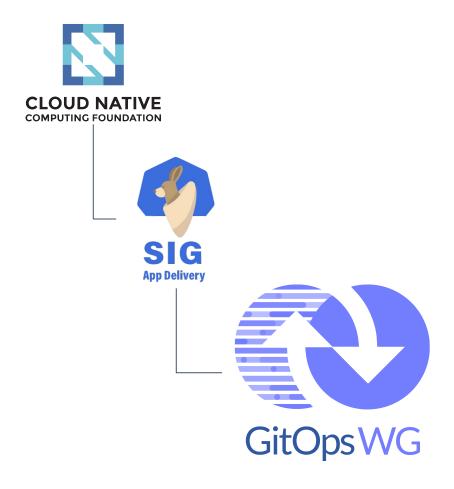

The focus of the GitOps Working Group is to clearly define a vendor-neutral, principle-led meaning of GitOps. This will establish a foundation for interoperability between tools, conformance and certification.

#### Co-chairs:

- Leo Murrillo, Cloud-native Architects 💟 @m
- Scott Rigby, Weaveworks () @r6by

## Backlog:

- GitOps Con Zero day Kubecon event
- GitOps Priniciples
- Website
- Samples i.e. <a href="https://github.com/cncf/podtato-head">https://github.com/cncf/podtato-head</a>

#### Future:

- GitOps Landscape
- Certifications

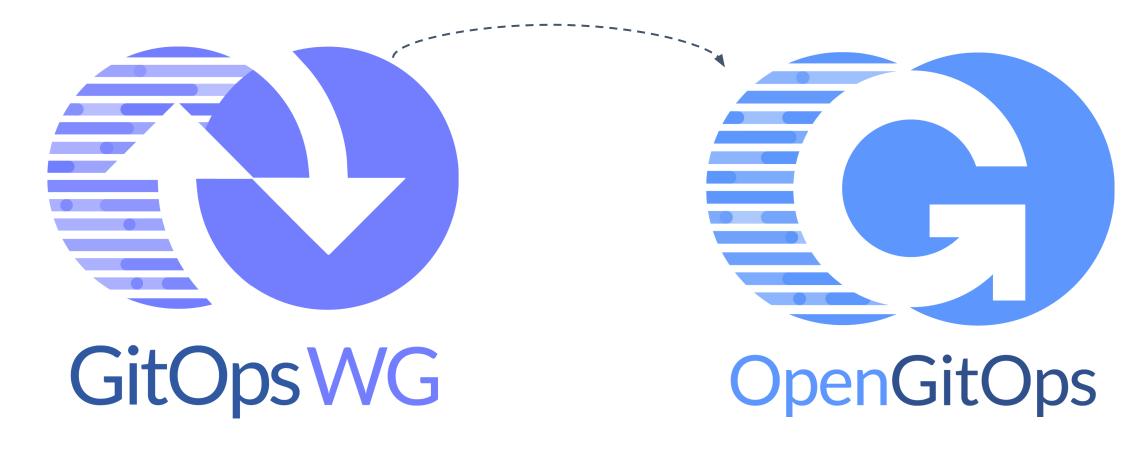

Lasting programs, documents and code will live within the Open GitOps project.

Currently CNCF sandbox!

## Creates and cares for

# **GitOps Definition**

- Proposed in PR #48
- Glossary (Desired State, State Store, Reconciliation)
- Principles
- Rationale

# **GitOps Principles**

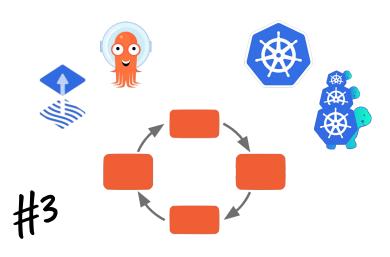

desired state expressed declaratively

stored in a way that supports versioning, immutability of versions, and retains a complete version history

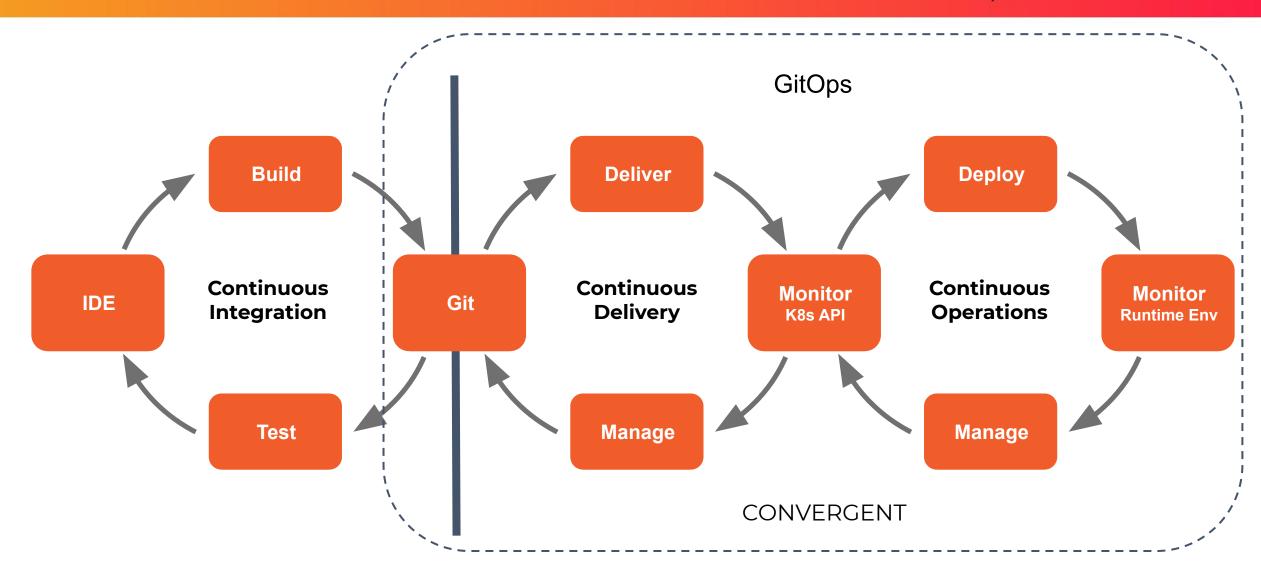

### **Software agents**

continuously, and automatically, compare a system's Actual State to its Desired State
